

# HIP PAIN?

*Have you heard about anterior hip replacement surgery?*

**Compared To  
Traditional Techniques:**

No Muscle Cutting

Smaller Incision

No Post-Operative Restrictions

Faster Recovery

Quicker Return To Normal Activities

**Steven Naide, MD**

**Bruce Janke, MD**

This new approach to hip replacement surgery allows full recovery faster than traditional hip replacement surgery. Dr. Naide and Dr. Janke are the only surgeons in South Florida using a specially designed operating table to facilitate the anterior hip approach.
